

Boiler Systems PLUS Training Basics

The overall objective of this course is to build upon prior knowledge while emphasizing energy conservation, emissions reduction, system reliability, and safety. This includes a more in-depth understanding of boilers and how they can be successfully applied to various processes while saving energy through retrofittable options and control updates. The program extends out into the plant to include key components of the steam distribution and recovery piping, focusing on optimizing energy efficiency and safety.

Well trained boiler operators and maintenance personnel will improve your bottom line

- *Reduce energy costs by knowing how to keep a system running at peak efficiency*
- *Extend equipment life by knowing how to keep a system tuned and clean*
- *Recognize pending safety issues and know what to do in an emergency*
- *Minimize downtime by applying the most current operating & maintenance practices.*

Operations, Safety, Reliability & Efficiency

DJ Conley Associates Inc. and Dean Boiler, Inc. are pleased to offer this two-day seminar to boiler operators, maintenance personnel and plant engineers.

- Learn how to operate boilers and related accessories safely while optimizing reliability and maximizing system efficiency
- Learn best practices for operations and maintenance
- Review of the latest technologies for safety, energy efficiency, and emissions reduction.

*** INCLUDED IN THIS SEMINAR ***
Special presentations by

Brad Savage; Merlo — Steam Traps & Systems
Andy Peterson; KLM—Chemicals/Water Treatment
Catie VanWormer; Cleaver Brooks—HW Boilers

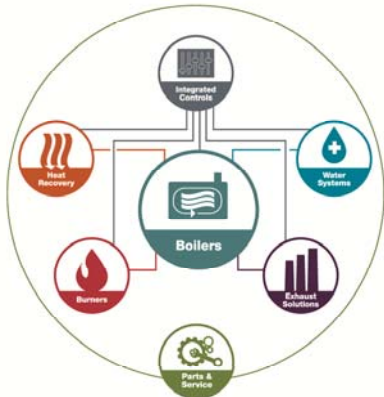

Monday-Tuesday, April 24 & 25, 2017

7:30—4:00

Cost: \$525 USD each

*Includes all course materials,
(2) continental breakfasts, (2) lunches and*
